KEY PROJECTS

MICROSOFT (2017 ONWARD)

PARTNER-CENTER-PROSE

Skills & tools used: C#, WebAPI, Angular2-Typescript

This is an internal tool used by the biz-ops teams to support queries of our customers-partners. The tool is enables the support person to retrieve all the required information based on scenario. Majorly built on Angular2 using Typescript & relevant WebApis.

I have contributed by converging a couple of internal ad-hoc tools to a full blown set of APIs and pages in prose and some more.

PARTNER-CENTER-HPC/HDC

Skills & tools used: C#, WWF, asp.net Razor

This is partner facing website for Microsoft partners who develop Hardware drivers and allied artefacts. The portal allows them the upload drivers etc to ingest into Microsoft hardware-driver publishing pipeline. It involves a website to upload & see status of the driver publishing and a set of workflows which takes care of all the validations etc & pushing the driver further to windows updates pipeline.

My role was to understand hardware-publish process, design-develop new features, support new scenarios in hardware publishing, maintain the existing flows as required time and again.

PARTNER-CENTER-HARDWARE API

Skills & tools used: C#, Asp.Net Core Web-API

For many years' driver authors have published the drivers for windows via a web portal which involved manual work. The above API is a greenfield project which addresses the need of an API layer which enables the driver authors, especially the large corporations, to automate the driver signing and publishing workflows at their end. The APIs are authored from ground up and still maintains the backward compatibility with the existing infrastructure by leveraging the existing workflows by adding few wrapper workflows.

I was involved in end to end delivery of the APIs. Collaborated with 6 big partners during the beta phase & was responsible for handling all communication, get feedback & unblock partners.

PARTNER-CENTER-ACCOUNTS

Skills & tools used: C#, Asp.Net Web-API

Accounts has a horizontal responsible for authentication and authorization of partners in different subsystems/microsites of partner center. It also handles enrollment to different programs, permission sets, check-Access APIs etc.

I am responsible for maintenance of existing system and owing new features being added over a period of time.

ZNALYTICS (CALENDAR YEAR 2016)

PRODUCT-AMPZ

Skills & tools used: C#, WebAPI, Azure, Azure-AD, Angular, Jira, Bitbucket

Product for utility domain accounts management is developed in angular, webapi & sqlazure. However, it is designed as cloud provider agnostic and can be hosted with multiple cloud offerings in market like Azure & AWS.

It is theme based, implements unit tests for web-api, CICD on webapi side.

PRODUCT-PREENROLLMENT

Skills & tools used: C#, WebAPI, Azure, Azure-AD, Angular, Jira, Bitbucket

Product for utility domain which can be sold as independent or add-on to existing product & has been developed in angular, webapi & sqlazure.

I am handling multiple roles/responsibilities as a technical-manager viz collaborating in onshore/offshore setup interacting with stakeholders. Giving high-level design, unblock teams on technical challenges, if required-low-level design, proof of concept applications for the team to implement required features in the product. Track the delivery of work-items, mitigate & close the gaps in delivery.

DELOITTE (CONTRACT VIA MAGNA INFOTECH)(CALENDAR YEAR 2015)

USGA-GOLF MANAGEMENT

Skills used: C#, WebAPI, Azure, Azure-AD, SQL-Azure, Redis, Azure Web-Worker Role

This is an app with Angular front end powered by WebAPI based services & database in SQLAzure. I was responsible for giving guidance & see the delivery through for features related to webapi integration with angular frontend, enable oAuth security with azure-ad, redis cache implementation, code reviews. Also have enabled many of the offline jobs via azure worker role implementation.

MICROSOFT (2008-2014)

DISCO (DISCOVERY & COLLABORATION)

Skills used: C#, WebAPI, Azure, Azure-AD

I worked on a dev kit to enable application security with authN, authZ, Redis, and Azure in role cache templates. Microsoft IT moved its applications to Azure to enable Mobile first-cloud first vision within IT. My DisCo team is put together to help provide that help wherever possible and to enable the mobile-first, cloud-first strategy vision of the company.

SONIC (SECURE ONLINE .NET INTEGRATION COMPONENT)

Skills used: VB.NET, C#, SQL Server

I worked with Microsoft IT to integrate with several disparate partners systems. Information was published via a file channel or msmq which needed to be integrated internally with systems which understand files, msmq, Webservice, etc. The 10-year-old software was written in VB.NET (VS2003, SQL2005) we migrated it to C# (VS2012, SQL 2012).

ENTERPRISE SERVICE BUS: TEST AUTOMATION FRAMEWORK

Skills used: C#, Winforms, WCF, SQL Server, BizTalk Server 2009 & 2010

I was designed and developed test automation framework and utilities for the ESB application. ESB is a Biztalk based enterprise application integration system which supports message formats like XML, EDI, X12 and communication channels including Wshttp, net-msmq, net.tcp, flat file etc. I planned and managed, conducting performance tests for the system for multiple releases. I also handled a couple of releases independently end-to-end.

ESB-LOAD TESTING TOOL

Skills used: C#, Multithreading & WCF

I designed and developed the entire module, and performed unit testing. This work enabled load test the entire ESB system and measure the throughput, identify memory leak, stress on the system during a long run.

RXP PLATFORM SDK, RXP STUDIO & CATALOGUE

Skills used: C#

I greatly contributed in designing of application and unit testing of the overall SDK. IT wanted to develop services with a set of services and ability to share information across different divisions/projects. This enables it by implementing C# project templates and a common web portal to share.

SYNRECHON

WEB SERVICE FOR RETRIEVING MORTGAGE INSURANCE DATA.

Skills used: C#, ASP.NET, .NET framework 1.1

I coded the HTTP module & asmx Webservice with cryptographic security for a Web service which retrieves information about Insurance for Mortgages.

EMAIL QUEUE COMPONENT

Skills Used: C#, SQL Server

I coded the email queue and supported UI development to enable user selection for email triggering events. This coding facilitated queuing of the email information into a database queue table. The emails were later dispatched in batch fashion at intervals.

RHEAL

BAS-PPC (POCKET PC) MODULE FOR BARCODE APPLICATION SOLUTION, CANADA

Skills used: C#, SQL-CE

I conducted a PoC. Leading conceptualize, design & deliver effort along with one junior engineer. The PPC Module was an application installed on Pocket PC and interacted with another desktop application through one web service. It was a part of Inventory Control Application. The pocket PC application used SQL-CE as a local store which used to store data for offline usage and syncing via Webservice.

PROEST – CMS TAKEOFF & ESTIMATING FOR CONSTRUCTION MANAGEMENT SOFTWARE (CMS) USA

Skills used: VB.NET, Multithreading, SQL Server 2000, Crystal Report

I was responsible for requirement gathering, technical analysis and design, architecting, coding the application, handling client communication and leading the team. The ProEst is a Construction Management software which enabled drawing of plan-layouts either through mouse or read it through the Digitizer Device.

EYEGLOBAL TECHNOLOGIES

X-PAY (PAYROLL MANAGEMENT)

Skills used: VB 6.NET, SQL Server 2000, Crystal Report 8.5

I performed requirement gathering and development of payroll system with my team. The X-Pay is a Leave management and Payroll System which stores employee-wise salary parameters for different income and deduction and generates salary statements.

ATM INTERFACE (NCR MACHINES)

Skills used: VB 6, Btrieve (Pervasive), SQL Server 2000, MS-Access

I Analyzed, designed, coded, and tested the ATM interface software which performs various operations like validating and allowing or rejecting the operation requested by the user viz., Balance Enquiry, Mini Statement, Withdrawal request, Pin Change, Fast Cash And Cash Transfer operations. The software uses its own encryption and decryption in different operations.

VISUAL X-CHEQUER (BANKING SOFTWARE)

Skills used: VB 6, SQL Server 2000

I worked on the savings, current, remittance, and cheques modules of the Visual X-Chequer, which is a complete back-end independent banking solution based on COM and can be deployed as per customer requirement.

TOUCHSCREEN KIOSK & AUTOMATED VOICE RESPONSE SYSTEM (AVRS)

Skills used: VB 6, SQL Server 2000

I Streamlined the operations by debugging and fixing errors, and ensured smooth execution of AVR system for

a touchscreen kiosk for customers who visit the bank and AVR for phone banking.

HEAD OFFICE & RBI MODULE (SOFTWARE FOR BANK HEAD OFFICE)

Skills used: VB 6, MS-Access, Crystal Report 8.5

I Analyzed, designed, coded, and tested the Head Office module. This software collects data from various branches and clearing entries for reconciliation, which is useful in generating a consolidated report like TB, PL, BS and RBI reports. RBI reports such as Form 9, Form 1, CRR, SLR are also configured.

NIRMITI COMPUTERS

SHIVANJALI BANKING SYSTEM (BANKING SOFTWARE)

Skills used: VB 6, SQL Server 2K, Crystal Report 8.5

I developed a Saving, Loan and Deposit module for a system handles day to day transactions for a bank and useful for reporting of shares, interest paid, received, as well as account statements up to finalization. Also pigmy deposits, a major source of deposits for a small society in Indian banking scenario, are handled by the software.

CUSTOMIZED ERP SOLUTION FOR EMCO LTD. (ERP - MANUFACTURING)

Skills used: VB 6, Oracle 7.3, Crystal Reports 8.5

I analyzed, designed, coded, and tested for modules like BoM, Material Procurement, Accounts and concerned reports. The ERP facilitates managing company activities like Marketing, Accounts, Order Processing, Production Planning, Stores, and Purchase, etc.

FAIC (ACCOUNTING AND INVENTORY CONTROL SYSTEM)

Skills used: VB 6, SQL Server 2000, Crystal Report 8.5

I debugged the software and understood the existing design of a half-baked software application. This application provides accounting and inventory functionality.

CUSTOMER CARE MODULE (MOBILE CUSTOMER CARE CENTER, BSNL JALGAON, INDIA)

Skills used: VB 6, MS-Access, Crystal Report 8.5

I designed the application flow and UI of a tiny application to maintain the log of customer complaints and track resolution.
